

FOOTWEAR 220

TOTAL PLANE SERIES

Total Plane Easy Step Footwear is one among the many beautiful products of SIR SAFETY SYSTEM.

It is made by:

- First-rate Eco Friend Leathers
- Lining with elevate draining power which reduce the superheating caused by long use
- Bi-component insoles with anti-shock features and reduction of foot's perspiration
- Ultra light toecap in compound material according to the EN 20345 standard
- Ultra flexible non puncture midsole in textile material according to EN 12568:2010 **"ZERO Penetration"**
- Ultimate concept tri-component sole. The material used, such as polyurethane and TPU, provide to the shoes an extraordinary softness and a very elevate mechanical and abrasion resistance
- Upper: Premium Quality Leathers

Main Features:

- **Elevate Flexibility in the Sole**
The Horizontal canals have been expressly projected to support the foot's bend and movement. The result will be a more rapid step and a less tired body.
- **Total Plane improves the foot posture**
With the supporting outsole extended also into the arch area, the foot works in a more uniform way. The body's weight distribution will be highly improved.
- **Elevate anti-slip coefficient SRC Standard**
The sole special design and the wide contact surface in the arch area provide to the shoes an elevate anti-slip coefficient even on wet soils on smooth surfaces.
- **Elevate Elasticity Sole Reactive Effect**
At any movement it is possible to perceive the sole elastic and reactive effect. The wide cells expanded polyurethane forming the intersole responds with elasticity step by step lightening the body weight.
